Forecast for Thursday 18 Jul 2024

Weather: An overcast and damp day with outbreaks of rain and drizzle. A few heavier spells in the morning, but becoming generally lighter by the afternoon. Murky conditions in the evening. Fresh to strong summit winds.

Chance of cloud-free hill tops above 700m: 10%, best of any chance during the morning.

Low cloud and visibility: Overcast cloud bases 600-700m, occasionally falling to 400m in drizzle. Visibility generally moderate below cloud, but poor in drizzle. Lowering cloud bases in the evening brings the risk of a few mist or fog patches down to valley level, particularly on southerly and easterly upslopes.

Meteorologist's View

Nothing to add.

Forecast for Friday 19 Jul 2024

Weather: Risk of low level mist and fog patches at first. Otherwise a dry and bright day with perhaps a few spells of hazy sunshine.

Maximum wind: Southerly 25-35 mph.

Chance of cloud-free hill tops above 700m: 70%

Low cloud and visibility: Poor or very poor visibility in low level mist and fog patches during the morning. Otherwise visibility will be good with just a few patches of summit cloud around at times.

Temperature: **Valleys:** Plus 13 Celsius rising to 17 Celsius.
At 700m: Plus 9 Celsius rising to 12 Celsius.
Freezing level: Above summits.
